# A Place to Grow, Excel, Invent & Innovate!

Dayananda Sagar Institutions founded in the 60's by a visionary, Late Sri. R. Dayananda Sagar (Barrister-at-Law) committed to take knowledge to the people, transforms today's students into responsible citizens and professional leaders of tomorrow. Dayananda Sagar University created by an Act of the Karnataka State in 2014, built on this adorable legacy and inspired by its own milestones, meeting the needs of quality higher education in this part of the world.

This main campus is thoughtfully planned on 130 acres, with a picturesque site and a blossoming green environment, making it free from city crowds and pollution. Being a completely self-contained campus adjacent to Harohalli Kanakapura Road, Bengaluru South District., it is equipped with all the modern state-of-the-art infrastructure, creating a conducive environment for progressive experiential learning and transforming you into next-generation innovators, explorers, leaders, and researchers.

## University Accreditation and Rankings

# About School of Engineering (SoE)

Welcome to the cutting-edge realm of engineering excellence at the School of Engineering (SoE), Dayananda Sagar University (DSU). The School of Engineering (SoE) at Dayananda Sagar University (DSU) provides world-class education and experiential training in engineering, with a strong focus on innovation across various disciplines such as Computer Science, Artificial Intelligence, Robotics, and more. The unique and multidisciplinary learning environment is supported by state-of-the-art infrastructure, job-role-based emerging specialisations, innovative pedagogy, a contemporary curriculum, multifaceted faculty, strong industry collaborations, and impeccable placements.

It has emerged as the top choice for students who aspire to become next-generation technocrats, innovators, developers, and creators. Our advanced and exceptional M.Tech programs are meticulously designed to propel students to the forefront of evolving technologies. These programs offer specialised majors that allow learners to explore their areas of interest and expertise in depth—whether in computer science, electronics, or other engineering disciplines. Students are also exposed to knowledge beyond their chosen specialisation, helping them broaden their perspectives and enhance their intellectual horizons.

## School Vision

Transform lives through excellence in engineering education, research, and innovation with an emphasis on sustainability, inclusive technologies, and global needs.

## School Mission

1. Design and deliver contemporary engineering curricula to address regional and global needs while emphasizing ethics, values, integrity, and regional relevance.
2. Carry out high-impact academic research, industry projects, and innovation activities with active student engagement to advance science and engineering knowledge and state-of-the-art industry practices.
3. Develop regional and national leaders to advance the society and economy.

## Message from the Dean

# BE YOU BE THE DIFFERENCE!!!

Welcome to the new way of learning at School of Engineering (SoE) of Dayananda Sagar University (DSU). At SoE, we are committed to helping you to make a positive difference in the world. We at SoE are immensely proud to provide all of our students with an outstanding education that equips them with the skills, experience, and confidence required to stand out from the crowd. The School promotes Culture of Excellence including the culture of Interdisciplinary, Research, Creativity, Innovations, and Entrepreneurship on various Cutting-Edge Technologies. We at SoE, provide the World-Class Education that is Student-centric, Research-centric, and educational space where all of our students will have a transformative education, learn to be independent critical thinkers, be societally and ethically responsible, and to have a broad understanding of the world.

We value ability, not background, and we support all of our students to achieve their potential. We want you to enjoy your time here, confident that, upon completion of Engineering degree program under SoE, you will have the knowledge, expertise, and employability skills to set you on your chosen career path. The decision you make about where to study is an extremely important one. I am pleased you are considering the School of Engineering at DSU, and hope that you choose to continue your education with us.

BEST WISHES!

**Dr. Udaya Kumar Reddy K R**  
Dean, School of Engineering

# Program Overview

The M.Tech in Artificial Intelligence & Robotics is a two-year full-time postgraduate program designed to build expertise in intelligent systems, autonomous platforms, and advanced AI algorithms. Students will engage in hardware and software labs, research projects, internships and a two-semester capstone.

## Program Duration

**Two years (4 Semesters)**

## Program Eligibility

Pass in BE/B.Tech in ECE, CSE, ISE, Biomedical, Medical Electronics, Electronics & instrumentation, EEE, Telecommunications, Mechatronics and other circuit Branches with a minimum of 50% marks in aggregate (45% in case of candidate belonging to SC/ST & OBC). M.Sc./MCA applicants must demonstrate programming skills in Robotics, AI, or Control Systems

\* Note: Upon successful completion of the M.Tech programs (CSE/AI & ML/ AI & Robotics/ AI/ AI & DS), candidates are offered a job with a starting salary of INR 65,000 per month for a year which will be extended after evaluating his/her performance deliverables as per the Organization.

## Program Objectives

- ◆ Build advanced expertise in AI, machine learning, control systems and robotics engineering.
- ◆ Provide hands-on experience with robotics hardware, sensors, embedded systems and real-time controllers.
- ◆ Foster research skills and industry-ready project experience.
- ◆ Prepare graduates for leadership roles in R&D, product development and entrepreneurship.

# Student Learning Outcomes

## Knowledge & Understanding

- ◆ Understand foundations: robotics kinematics/dynamics, perception, ML fundamentals.
- ◆ Master deep learning, computer vision, reinforcement learning and probabilistic methods.

## Application & Analysis

- ◆ Design and deploy intelligent robotic systems integrating sensors, actuators and controllers.
- ◆ Perform state estimation, SLAM, and real-time navigation solutions.

## Professional Competencies

- ◆ Communicate technical work and collaborate in interdisciplinary teams.
- ◆ Apply ethical principles in AI and safety-aware system design.

# Program Unique Features

- ◆ Robotics-Focused Curriculum – Integration of AI, autonomous systems, perception, and control
- ◆ Industry Collaboration – Partnerships with robotics, automation, and smart manufacturing companies
- ◆ Hands-On Learning – ROS, robot simulators, embedded hardware, industrial robot cells
- ◆ Expert Faculty – Specialists in AI-driven robotics, SLAM, HRI, and computer vision
- ◆ Strong Research Orientation – Publications and patents in robotics & intelligent systems
- ◆ 6-Month Internship – Industry internship in Robotics, Autonomous Systems, Industry 4.0
- ◆ Capstone Project – Robotics innovation with prototypes or publishable outcomes
- ◆ Career & Startup Support – Placement assistance & incubation for robotics ventures

# Curriculum Structure

## Semester I – Foundations (Examples)

- ◆ Foundations of AI & Machine Learning
- ◆ Advanced Robotics: Kinematics, Dynamics & Control
- ◆ Computer Vision & Scene Understanding
- ◆ Embedded Systems & Real-Time Robotics

## Semester II – Advanced Intelligence (Examples)

- ◆ Deep Learning and Neural Networks
- ◆ Probabilistic Robotics & State Estimation
- ◆ Reinforcement Learning & Optimal Control
- ◆ Natural Language Processing &
- ◆ Conversational AI

## Semester III – Specialization & Internship

### Elective categories (sample courses)

- ◆ Human-Robot Interaction
- ◆ Swarm and Multi-Agent Systems
- ◆ SLAM (Simultaneous Localization and Map- ping)
- ◆ Edge AI & TinyML
- ◆ Biomedical Robotics
- ◆ Autonomous Vehicles & Unmanned Systems
- ◆ Ethics and Policy in AI

## Semester IV – Industry Internship (Mandatory — typically 6 months).

- ◆ Year-long dissertation or industry project focused on publishable research or product-grade solutions (autonomous navigation, medical robotics, perception systems, intelligent control, etc.).

## Domain / Track Wise Elective Options

Students choose 4 electives from the following tracks/domain areas:

### Core AI & Robotics

- ◆ Advanced Artificial Intelligence
- ◆ Machine Learning for Robotics
- ◆ Robot Kinematics & Dynamics
- ◆ Robot Operating System (ROS) & Autonomous Control Intelligent Sensing and Perception
- ◆ Computer Vision & Deep Vision Systems
- ◆ Reinforcement Learning for Robotics
- ◆ Human–Robot Interaction

### Industrial Collaborative Robotics

- ◆ Industrial Automation Smart Manufacturing Collaborative Robots (Cobots)
- ◆ Robotics in Industry 4.0
- ◆ Real-time Monitoring Predictive Maintenance Digital Twins for Robotics

### Autonomous Systems Mobility

- ◆ Autonomous Ground Vehicle Technologies
- ◆ Aerial Robotics (Drones)
- ◆ SLAM and Navigation Systems
- ◆ Electric Mobility ADAS
- ◆ Vehicular Communication (V2X)

### Medical Service Robotics

- ◆ Surgical Robotics
- ◆ Rehabilitation and Assistive Robotics
- ◆ Biomedical Sensors Wearable's Healthcare
- ◆ Automation Systems

# Why AI & Robotics?

## The Future Is Autonomous

AI and robotics are transforming healthcare, manufacturing, transportation, defense and consumer products.

## High Demand Roles

Graduates are prepared for roles in robotics engineering, perception, control, ML engineering, and autonomous systems development.

## Industry Growth.

Career opportunities are expanding with strong market growth in robotics and AI industries.

# Career Prospects & Opportunities

## High-Demand Roles (Indicative packages)

Industry Sectors: Manufacturing, Autonomous Vehicles, Healthcare Robotics, Aerospace & Defense, Consumer Robotics, IT & Cloud.

### Career Paths Opportunities

Robotics Engineer – Average Salary: 20–25 LPA

AI Research Scientist – Average Salary: 30–35 LPA

Autonomous Systems Developer – Average Salary: 20–30 LPA

Machine Learning Engineer – Average Salary: 20–30 LPA

Computer Vision Specialist – Average Salary: 30–35 LPA

Machine Learning Engineer / Deep Learning Specialist : 30–35 LPA

Perception Engineer (Vision Sensor Fusion) : 30–35 LPA

Control Systems Engineer / Motion Planning Specialist : 30–35 LPA

Research Scientist / PhD Candidate : 30–35 LPA

Product Manager for AI/Robotics Products : 30–35 LPA

Entrepreneur / Startup Founder in Robotics AI : 30–35 LPA

# Emerging Job Opportunities

Here's a breakdown of how different industries are hiring AI & ML Graduates

Industry	Job Roles	Applications & Projects	Hiring Companies
Manufacturing & Logistics (Industry 4.0)	1. Predictive Maintenance Engineer / Analyst 2. Data Scientist (IoT & Industrial Analytics)	AI: Predictive maintenance, quality control, supply chain optimization. Robotics: Industrial arms for assembly/packaging, Autonomous Mobile Robots (AMRs) for material movement in warehouses.	Bosch, Siemens, Fanuc, ABB, Flipkart, Amazon, Delhivery
Automotive	1. Robotics Automation Engineer 2. Computer Vision Engineer 3. Autonomous Vehicle (AV) Engineer	AI: Driver-assistance systems (ADAS), self-driving car algorithms, connected car data analytics. Robotics: Robotic assembly lines, painting, and welding.	Tesla, Toyota, Tata Motors, Mercedes-Benz, NVIDIA
Healthcare	1. Robotics Automation Engineer 2. Computer Vision Engineer 3. Autonomous Vehicle (AV) Engineer	AI: Medical image analysis (MRI, X-Ray), drug discovery, personalized medicine. Robotics: Surgical robots (e.g., Da Vinci), rehabilitation robots, hospital logistics robots.	Intuitive Surgical, Philips, Siemens Healthineers, BioCon
IT/Software & Product Companies	1. Machine Learning Engineer 2. AI Research Scientist 3. NLP Engineer 4. Robotics Software Engineer	AI: Developing AI platforms, cloud AI services (AWS, Azure, GCP), generative AI tools, recommendation engines, chatbots. Robotics: Development of robotics software platforms (e.g., ROS), simulation software.	Microsoft, Google, Amazon, NVIDIA, IBM, Adobe, Uber
Aerospace & Defence	1. GNC Engineer (Guidance, Navigation, & Control) 2. Swarm Robotics Engineer 3. AI/ML Engineer for ISR (Intelligence, Surveillance, and Reconnaissance) 4. Sensor Fusion Engineer	AI: Surveillance systems, drone swarm intelligence, threat detection. Robotics: Unmanned Aerial Vehicles (UAVs/drones), unmanned ground vehicles (UGVs), exoskeletons.	DRDO, ISRO, HAL, Boeing, Airbus
Agriculture (Agri-Tech)	1. Agricultural Robotics Engineer 2. Drone Systems Engineer (Agri-Drones) 3. Digital Agriculture / Farm Management Software Engineer	AI: Crop health monitoring, yield prediction, precision farming. Robotics: Autonomous tractors, robotic harvesters, drone-based spraying.	Ninjacart, CropIn, Fasal, TartanSense

## Industry Partnerships & Collaborations

Tie-ups with leading AI and robotics companies for internship, live projects and placements. Guest lectures, workshops and collaborative research with national laboratories and international universities.

# Hands-on Learning & Research

- ◆ Capstone: Industry-mentored or research-oriented project.
- ◆ Research Labs: Autonomous systems arena, perception labs, embedded systems lab, GPU compute cluster.
- ◆ Internships: Mandatory with partner organizations.
- ◆ Competitions: National/international robotics and AI challenges.

## Facilities & Infrastructure

Robotics workshop:  
fabrication, sensors,  
actuation tools.

High-performance  
GPU cluster and deep  
learning labs.

Autonomous vehicle  
testing arena and  
motion capture.

Embedded systems  
and real-time  
controllers lab.

Library access to major  
AI/Robotics journals  
and datasets.

# Faculty & Research

## AI & Robotics

### Distinguished Faculty

The program is led by expert faculty with advanced research and industrial exposure in Artificial Intelligence, Robotics, Automation, and Intelligent Systems.

### Faculty Expertise Areas

- ◆ Robot Kinematics & Dynamics
- ◆ Autonomous Navigation & SLAM
- ◆ Machine Learning & Deep Reinforcement Learning for Robotics
- ◆ Robot Perception: Computer Vision & Sensor Fusion
- ◆ Human-Robot Interaction (HRI)
- ◆ Industrial & Collaborative Robotics
- ◆ Edge AI, Embedded Systems & Real-time Control
- ◆ Soft Robotics & Bio-inspired Robotics

## Research Facilities

### Robotics & Intelligent Systems Laboratories

- ◆ Industrial Robot Work cells (KUKA, ABB, UR Cobots)
- ◆ Mobile Robotics Platforms (AGVs, AMRs)
- ◆ Drone & UAV experimental setup
- ◆ ROS-based control & simulation suites (Gazebo, MoveIt)
- ◆ Sensors & Actuators: LIDAR, RGB-D Cameras, IMUs
- ◆ Embedded systems lab (NVIDIA Jetson, Raspberry Pi)

### High-Performance Computing & AI Infrastructure

- ◆ GPU clusters for deep learning model training
- ◆ Cloud robotics integration (AWS RoboMaker, Azure Robotics)
- ◆ Computer vision & big data analytics platforms

## Research Focus Areas

- ◆ Autonomous Systems – Navigation, mapping, self-driving mobility
- ◆ Robot Intelligence – Learning-based control, adaptive behavior
- ◆ Human–Robot Interaction – Safety, ergonomics, cognitive collaboration
- ◆ Soft & Medical Robotics – Healthcare, assistive mobility
- ◆ Edge & Cloud Robotics – Swarm robotics, federated learning
- ◆ Smart Manufacturing – Industry 4.0 automation & AI-driven inspection

## Industry Collaboration

- ◆ Joint projects with robotics & automation industries
- ◆ Workshops by organizations like ISRO, DRDO, CMTI
- ◆ Internships & placements with leading companies
- ◆ Sponsored research & consultancy with industrial partners

## Industry Tie-Ups and Industry Projects Executed by Students

Name of the consultant	Name of consultancy project	Consulting/ Sponsoring agency with contact details	Year	Revenue generated (INR in Lakhs)
Dr. GANGADHAR T G	AI & ML for Active Suspension Unit.	SPM INDIA LTDKT No, 182, GDR Tech vile Kethaganahalli Village Ramangar, District, 30th Km, NH 275, Bidadi, Karnataka 562109	2024	200000
Dr. GANGADHAR T G	Design and Development of Differential Pressure (DP) based and flow-based leak test panel along with interface of Embedded system software, Calibration with NABL Accreditation of pressure and flow. Testing along with EMI and environment for industrialization.	SPM INDIA LTDKT No, 182, GDR Tech vile Kethaganahalli Village Ramangar District, 30th Km, NH 275, Bidadi, Karnataka 562109	2025	200000

Dr. GANGADHAR T G	Servo Motor for Press & Slek Servo Motor for Nutrunner application	SPM INDIA LTDKT No, 182, GDR Tech vile Kethaganahalli Village Ramangar District, 30th Km, NH 275, Bidadi, Karnataka 562109	2025	200000

## Government Funded Project

Name of Faculty	Project Title	Funding Agency	Amount	Year of Sanction & Duration	Role (PI/Co-PI)	Status
Dr. Rupam Bhaduri	Integrated Clean Energy Material Acceleration by AI-ML Integration for Solar Photovoltaic and Thermal Energy Harvesters	DST, Ministry of S & T, Govt. of India	30.35 Lakhs	2022-23 (4 years)	PI	Ongoing

## Research Contributions

The department has achieved exceptional research output across journals, conferences, and patents.

- ◆ Total Publications: Over 18 high-impact research publications in IEEE, Springer, Taylor & Francis, Wiley, and other Peer reviewed journals.

### Patents (2025):

- ◆ Three Waves of COVID-19 in India - An Autoregression Model – Dr. Pramod Kumar Naik
- ◆ Dynamic energy management system for self-powered IOT devices using intelligent energy harvesting – Dr. Bharath Kumar S.

### Notable Publications:

- ◆ Intelligent Network and Systems Society: TERM: Throughput Efficient Resource Management Scheme for 5G Communication Using NOMA Systems – Dr. Pramod Kumar Naik
- ◆ John Wiley and Sons Ltd: Perovskite Solar Cell Stability Analysis Using Entropy-Based Support Vector Machines Learning – Dr. Rupam Bhaduri
- ◆ Taylor and Francis Ltd.: Photocatalytic performance of silver-doped titanium dioxide (TiO<sub>2</sub>) nanoparticles for environmental applications – Dr. Gangadhar T G

- ◆ Taylor and Francis Ltd.: Photocatalytic performance of silver-doped titanium dioxide (TiO<sub>2</sub>) nanoparticles for environmental applications – Dr. Gangadhar T G
- ◆ Taylor and Francis Ltd.: Mechanical performance of ABS/CNT nanocomposites developed by fused deposition modelling – Dr. Gangadhar T G
- ◆ Scientific Reports: Separator equipment performance of iron ore and coal using experimental and ANN-based analysis – Dr. Bharath Kumar S
- ◆ Canadian Metallurgical Quarterly: Experimental and prediction analysis of separating blast furnace slag in the vibratory separator – Dr. Bharath Kumar S
- ◆ Surface Review and Letters: Comparison of the performance of indirect evaluation of flank wear for turning Inconel-718 using the processed image and acoustic waves – Dr. Bharath Kumar S
- ◆ Biomass Conversion and Biorefiner: Augmented lipid biosynthesis in native fungus through dual-stage optimization of lignocellulosic biomass residue pretreatment and fermentation conditions – Dr. Bharath Kumar S
- ◆ Disaster Advances: Enhanced Recovery of Iron Values from Low-Grade Ores and Tailings through Reverse Cationic Flotation – Dr. Bharath Kumar S
- ◆ Disaster Advances: Experimental and statistical analysis on rate of penetration under the influence of rotational speed for drilling limestone in the open cast mine area – Dr. Bharath Kumar S
- ◆ Disaster Advances: Investigation of Dust Emission in Limestone Mines and its Statistical Prediction using Supervised Machine Learning (Regression) Modelling – Dr. Bharath Kumar S
- ◆ Disaster Advances: Development of beneficiation circuit for low-grade laterite iron ores sourced from the Gujarat area – Dr. Bharath Kumar S

## Industry Collaboration

- ◆ MoU with IMIB AND Flaunch Innovation: Promote and engage students and faculty in training by IMIB. Utilize a digital skilling platform to provide gamified, hands-on problem-solving experiences and challenges.
- ◆ MoU With Oppo Mobiles India Pvt. Ltd.: Academia, Industry Interaction, Research Collaboration & Relationship Building.
- ◆ MoU with SPM India Ltd to explore possible tie-ups in funded research projects, Students Internships, Placements. Undergraduate and Postgraduate students Projects.

# Why Choose DSU M.Tech in Artificial Intelligence & Robotics?

## Industry Collaboration

- ◆ Designed with robotics & automation industry experts
- ◆ Focus on Autonomous Systems, Human–Robot Interaction, SLAM, Drone Robotics
- ◆ Regular curriculum updates driven by Industry 4.0 needs

## Hands-On Robotics Learning

- ◆ ROS, Gazebo, MoveIt, Embedded AI with NVIDIA Jetson
- ◆ Real robots: AGVs, AMRs, Cobots, UAV platforms
- ◆ Capstone in autonomous robotics or computer vision applications

## Research Excellence in Intelligent Robotics

- ◆ Publications in robotics & intelligent systems domains
- ◆ Access to research grants and advanced laboratories
- ◆ Collaboration with organisations like ISRO, DRDO, CMTI

## Robotics Internship Integration

- ◆ Mandatory 6-month internship in robotics or automation industry
- ◆ Strong connections for placements with global robotics companies
- ◆ High opportunity for pre-placement offers (PPO)

## Capstone Project & Innovation

- ◆ Prototype development for real-world robotics challenges
- ◆ Guided by robotics researchers & industry mentors
- ◆ Encouraged outcomes: patents and research publications

## Career Development

- ◆ Interview coaching, portfolio development (ROS, CV, RL)
- ◆ Interaction with robotics experts and industry recruiters
- ◆ Support for PhD & robotic startup incubation

## Advanced Facilities & Diverse Community

- ◆ GPU-powered AI labs, industrial robotics infrastructure
- ◆ High-speed connectivity & cloud robotics platforms
- ◆ Collaborative learning with students from diverse domains

## Lab Infrastructure

### Data Structure and Deep Learning Lab

The Data Structure and Deep Learning Lab was enhanced with modern computing infrastructure, enabling students to gain hands-on experience in algorithm design, data organization techniques, and performance optimization. High-performance systems equipped with the latest compilers, debugging tools, visualization environments, and version-control platforms now support students as they implement foundational and advanced data structures. The upgraded facility allows learners to analyze algorithmic efficiency, simulate real-world computational scenarios, and engage in collaborative coding practices aligned with contemporary software engineering standards.

### Machine learning and Reinforcement Learning Lab

The Machine Learning and Reinforcement Learning Lab has been upgraded with GPU-enabled systems, cloud-integrated workspaces, and industry-standard platforms including TensorFlow, PyTorch, Scikit-learn, and Jupyter. The enhanced lab supports complete AI workflows—from data preprocessing and model development to tuning and deployment—across applications such as computer vision, natural language processing, and predictive analytics. These facilities strengthen experiential learning and equip students with strong AI/ML foundations and industry-ready skills for Artificial Intelligence and Robotics.

## Robotics Vision Lab

During the academic year, the Department of Artificial Intelligence and Robotics significantly strengthened its infrastructure by introducing advanced facilities to support teaching, research, and hands-on learning in embedded systems, FPGA design, and edge AI computing. A new FPGA and Edge AI Laboratory was established, equipped with state-of-the-art Zynq-based development platforms, including ZYNQ FPGA Boards, Xilinx Kria KV260 Vision AI Starter Kits, PYNQ Boards, and additional NVIDIA/Xilinx hardware for comparative workflow analysis in Robotics Vision Lab.

These additions enable students to gain practical exposure to system-on-chip (SoC) architecture, hardware–software co-design, and real-time deployment of AI-driven applications. The department also expanded its software ecosystem with licensed tools such as the Xilinx Vivado Design Suite, Microwind VLSI Design Software, and Jupyter Lab for Python-based hardware acceleration using PYNQ overlays.

- ◆ ZYNQ Board (FPGA Programming & Vivado flow)
- ◆ Xilinx Kria KV260 (Smart Camera & Video Analytics)
- ◆ PYNQ Board (Python-based overlay development)
- ◆ NVIDIA / Xilinx Boards (Used for workflow comparison)

## About Library

The Library, established alongside DSI and expanded with Dayananda Sagar Institutions (1969), Dayananda Sagar College of Engineering (1979), and Dayananda Sagar University (2014), was envisioned by the founder, Late Sri R. Dayananda Sagar, as a world-class knowledge hub. Built systematically, it accommodates 560 users and houses an extensive collection of books, CDs, DVDs, periodicals, and digital resources. Serving undergraduates, postgraduates, research scholars, and faculty, the Library reflects the University's academic excellence and is managed by a team of skilled and dedicated professionals.

# DSU Main Campus Hostel

## About Hostel

Our hostel, located within the heart of the DSU main campus, offers a perfect blend of comfort, safety, and convenience. Designed to meet the needs of today's students, our state-of-the-art facilities ensure that you have everything you need for a successful and fulfilling college experience. With a secure environment and a focus on student well-being, our hostel provides the ideal space for both academic focus and relaxation. Whether it's modern amenities, dedicated support for your studies, or a community that fosters growth, our hostel is your home away from home—helping you thrive every step of the way!
